

Company profile

Where safety and technology open new spaces

¿Who we are?

Ponzi S.R.L. is a leading Italian company specialised in **designing and manufacturing automatic doors for hospitals, hotels & resorts, airports, retail & distribution, and offices.** The know-how acquired in 80 years of activity guides the whole manufacturing process of our automatic doors, from the design to the installation and the maintenance, allowing to deliver customised solutions for your specific needs.

- We are a team of about 100 people
- We have a manufacturing plant of more than 15,000 m²
- We can manufacture up to 3,000 automatic doors per year

Our History

Foundation year of the blacksmith's workshop

1927
FOUNDER

The automatic doors division was born within the company, making use of the European partnership

1989
NEW DIVISION

Ponzi produced own automation line "Made in Italy". The mechanisms are designed, fabricated and tested independently within the Ponzi company and diversified according to the specific installation target.

2003
NEW LINE

The automatic door project evolves and the Ponzi Research and Development Office designs and installs the first automatic revolving door in the prestigious Bravo Building Italy.

2015
REVOLVING DOOR

The team: the company with the first workers made the transition from iron to aluminum frames

1955
THE TEAM

The specialization in the world of automatic pedestrian doors continues and segments dedicated to the hotel, hospital, airport and GDO are established

1997
SPECIFIC SOLUTION

Ponzi specializes in the hospital sector, creating the first hermetic automatic door Ponzi PSE suitable for installation in operating theaters, totally made in Italy

2006
HOSPITAL DIVISION

Following the trends of energy saving and sustainable buildings, Ponzi automatic doors, thanks to a new patent, are produced with thermal break profiles to contain thermal dispersion

2022
NEW PATENT

Our Excellence Factors

100% made in Italy: our automatic doors are manufactured in the main site of Bagnara in Emilia Romagna region;

highly performing solutions: we deliver specific solutions for a wide range of environments, among

turnkey solutions: we design, manufacture, and install our automatic doors, which are equipped with their Ponzi manufactured automations, thus ensuring competitive prices;

customised solutions: we deliver specific solutions for every architectural and technical need;

quality certificates: QUALITY MANAGEMENT SYSTEM CERTIFICATE in compliance with UNI EN ISO 9001;

patents: we got patents for our antipanic system for sliding curved doors plus a very unique experience on antipanic doors.

Our Vision, Mission and Values

Vision

We are guided by the unanimous and constant willing to set and reach new goals and to be a cutting-edge business in our sector, putting our expertise and passion at the service of two inseparable factors: safety and innovation. Such goals define the values that guide us at Ponzi S.r.l

Mission

Provide to the final client a customized product and “keys in the hand” starting from the study of the building and from the designing of the door, realization, installation and maintenance post-sale

Values

Maintenance, Exellance, Integrity and Reability, Looking-forward, Team collaboration, Pride, Sustainability. We pursue a sustainable innovation. We cultivate transparent relations and we value people

RESEARCH & DEVELOPMENT

The department is dedicated to studying the technological innovations to be used to improve products, create new ones and test production processes.

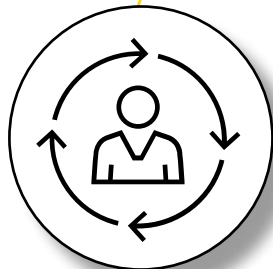

PROJECT DEPARTMENT

The technical department develops customized projects by adapting the resistance, functional efficiency, reliability and robustness of the project to the customer's requests, thus creating the most suitable solution.

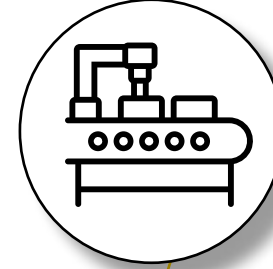

CUSTOMER NEEDS

Understanding and satisfying customer needs are an increasingly demanding challenge, which change more frequently than in the past. Ponzi staff interpret these needs by offering adequate goods and services.

PRODUCTION

The transformation process makes use of technologies, machinery, work, energy and raw materials, is aimed at the production of goods thanks to a fast and high production cycle, with tailor made experience.

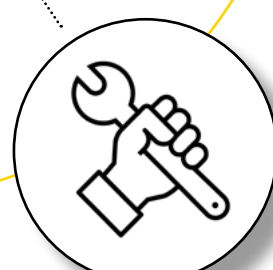

CERTIFICATIONS:

Ponzi products are certified at the European regulatory technical level and accompanied by Test Report, which verifies the product conformity with the requirements set for its suitability for installation, use and operation.

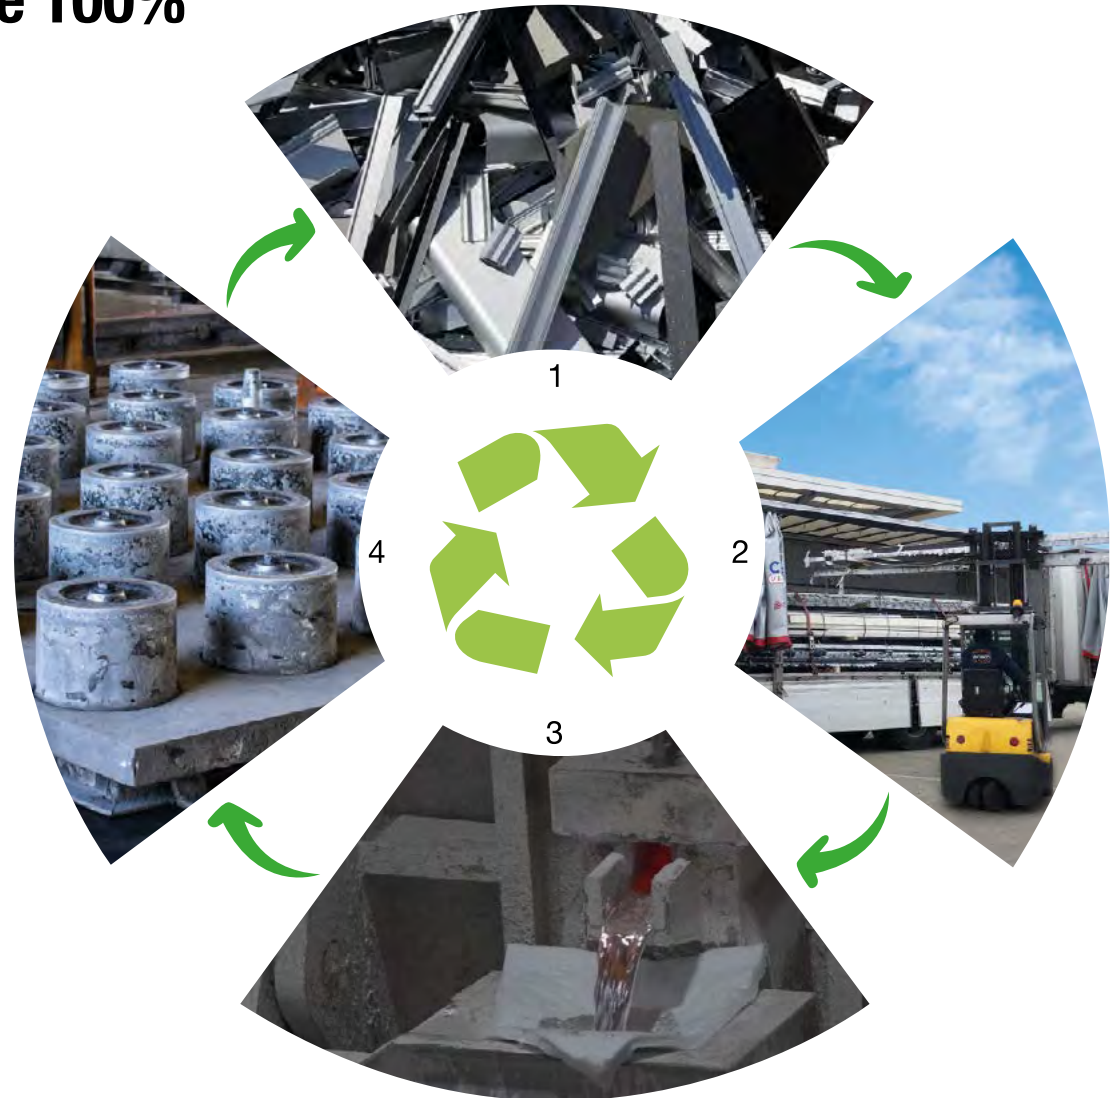

AFTER SALES ASSISTANCE

The technical-commercial office provides explanations through technical manuals and videos in the language, facilitating the assembly and long life of Ponzi products.

ALUMINIUM: Recycle materials to the 100%

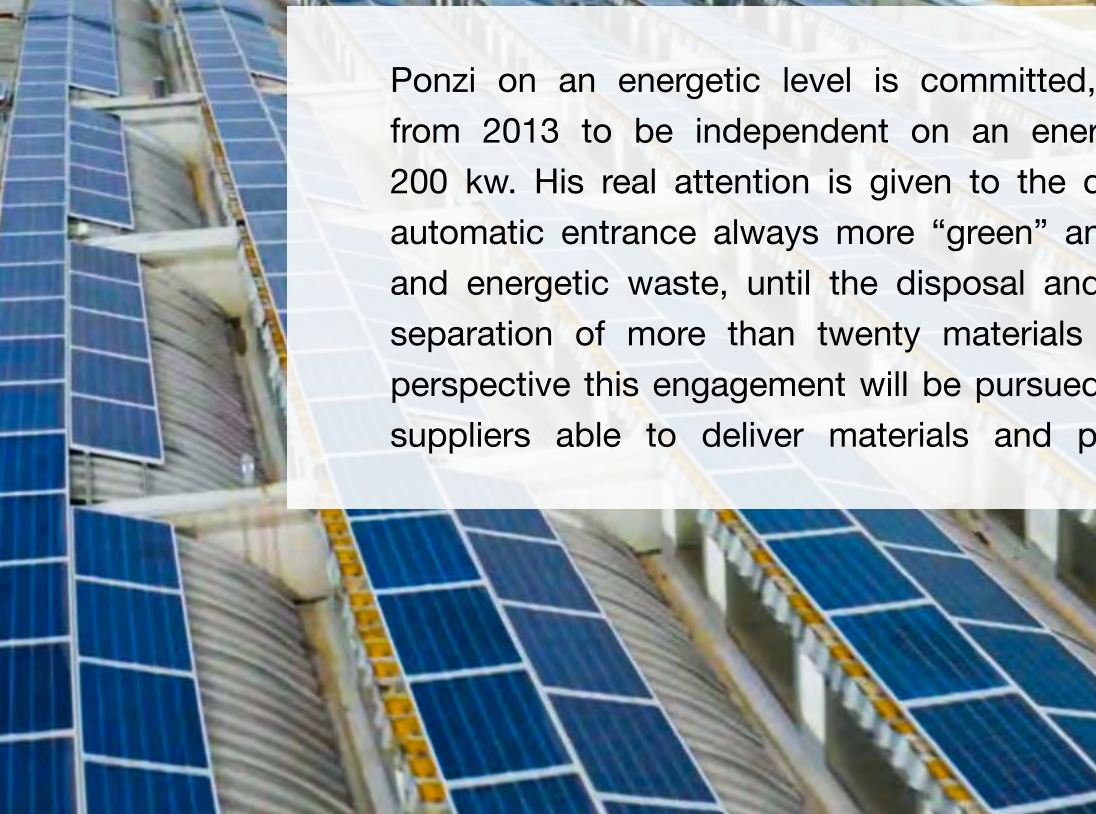

The waste separation, the recycling and the restoration of the aluminum which are promoted and pursued from Ponzi, bring several benefits to the environment. The recycling of the aluminum is a very important activity because through his fusion and his following extrusion, permits to save the 95% of the energy necessary to produce it. In this way the environment and its important natural resources are preserved. Aluminum is another noble material and represents an example of a circular economy. At the end of his own life cycle, every good is abandoned and begin the disposal, otherwise, where is possible as the aluminum, begin the restoration and the recycling or the reuse, guaranteeing sustainability. The result not only implies a huge saving of resources, but also a corresponding ecological advantage, with a removal of the emissions compared to primary production and no risk of environmental impact. During the production Ponzi the recycled product is synonym of sustainability and respect to the environment, preserving it for the future generations.

Renewable energy

Ponzi on an energetic level is committed, through the saving of traditional sources, from 2013 to be independent on an energetic level using a photovoltaic system of 200 kw. His real attention is given to the development of automations and systems of automatic entrance always more “green” and sustainables, in both terms of production and energetic waste, until the disposal and the recycle of materials, through the waste separation of more than twenty materials and raw materials inside the company. In perspective this engagement will be pursued again with more strength, selecting certified suppliers able to deliver materials and products with a low environmental impact.

What we Offer to Our Partners

Our commitment to excellence makes Ponzi S.R.L. a trusted and solid partner for:

DESIGNERS AND ARCHITECTS

The architect imagines and designs buildings, and guides their construction. He works in the building sector, combining the practical aspects of construction with the artistic ones: he can rely on the advice of our experts in order to find the best solutions for the needs of their customers.

DISTRIBUTORS AND INSTALLATIONS

Distributors are trained for the installation and the subsequent maintenance and long life of our automatic doors; they can rely on our continuous support in order to establish a fruitful relationship.

GENERAL CONTRACTORS

General contractor deals with the agreements with the Ponzi company to have a specialized supply of automatic doors and a valid collaboration in their design, construction and installation in the execution of construction, renovation, and the services necessary to respect and execute the customer project.

Our doors range

Our automatic doors stand out for their **quality**, thanks to which Ponzi S.R.L. has gained the trust of its customers over the years. **We offer solutions for the following environments:**

Offices

Hospitals

Retail & Distribution

Hospitals

Acibaden Hospital - Istanbul

Thanh Nhan Hospital Hanoi - Vietnam

Polyclinique d'Aubervilliers - Paris

Hospitals

This range of automatic doors offers as many solutions as the different kinds of hospital entrances, from main entrances to emergency room entrances, internal entrances, and surgery room entrances, thus allowing full accessibility to patients and disabled people.

For main entrances Ponzi S.R.L. offers a number of solutions - antipanic sliding linear and curved doors and antipanic folding doors -, whereas manual doors are available for patient rooms.

Ponzi S.R.L. is leader in the manufacturing of sliding hermetic doors for sterile environments such as surgery rooms, clean rooms, intensive care units, and laboratories of research; our sliding hermetic doors are manufactured both in stainless steel or laminate and ensure a perfectly hermetic sealing when closed.

Hotels & Resorts

Hotel Papadopoli - Venice

Hotel Palace - Milano Marittima

Palazzo Parigi - Milan

This range of automatic doors offers ultimate solutions for every kind of architectural structure and accommodation, from historic and luxury hotels to hotel chains and family-run hotels, as well as for restaurants, cafés, and wellness centres.

Our automatic doors for hotels & resorts include antipanic sliding linear and curved doors and antipanic folding doors and offer suitable solutions for both external entrances, thus giving great prestige to the facade of the accommodation, and internal entrances for hotel restaurants and cafés, thus dividing the different indoor spaces with a touch of class.

The elegance of design and materials pairs up with quality as our automatic doors for hotels & resorts prevent air flows and ensure acoustic and thermal insulation, thus allowing cost saving as well as a healthy environment. Guests will feel definitely comfortable!

Airports

With our range of airport automatic doors we have supplied most Italian airports with solutions meeting all the aesthetical, architectural, and qualitative requirements of such kind of environment.

This range of automatic doors offers suitable solutions for all the different airport areas, thus optimising the general layout as well as the daily flow of passengers. Such solutions include antipanic sliding doors that ensure safe and continuous entrance and exit of a great amount of people and luggage, and antipanic folding and swing doors suitable for smaller transit areas such as gates.

Our airport automatic doors offer security solutions for access control. In addition they prevent air flows and ensure acoustic and thermal insulation, thus allowing cost saving as well as a healthy environment.

Malpensa Airport - Milan

Ciampino Airport - Rome

Marconi Airport - Bologna

Retail & Distribution

Made in Italy Italian Food - Paris

Globo - Italian Footwear

Coop 3.0 - Supermarket

This range of automatic doors offers suitable and diversified solutions that are able to meet the different requirements of supermarkets, shops, and department stores.

Our automatic doors for such kind of environments include sliding linear doors that are suitable for the daily passage of large flows of people and carts. The Total Opening System device allows emergency exit through simple manual pressure on the door wings.

Our automatic doors for retail & distribution allow the total elimination of architectural barriers, prevent air flows, and ensure acoustic and thermal insulation, thus allowing cost saving as well as a healthy environment. In this way, quality, design, as well as our concern for comfort, constitute a unique union that contributes to the creation of a pleasant atmosphere for shopping.

The entrances of public buildings and companies must enhance the image and the importance of such environments; our automatic doors for offices are able to perform this task at their best with ultimate solutions that can be perfectly integrated in every kind of architectural structure.

Our automatic doors for offices include antipanic sliding linear and curved doors and antipanic folding doors for main entrances; suitable solutions for internal entrances and areas of reduced dimensions are also available.

In addition to their versatile design, our automatic doors for offices offer the ultimate standard of quality as they allow access control, prevent air flows, and ensure acoustic and thermal insulation, thus allowing cost saving as well as a healthy environment. For all these reasons, we have been chosen by many prestigious national and international public organisations and companies.

Terna Driving Energy - Rome

Vulcangas - Italian Liquid Gas Society

Italian Bank - Main entrance

Luxury shop

Miu Miu Bond Street Shop - London

Cartier Shop - Via Montenapoleone Milan

Dior Boutique - Cannes

Ponzi offers its own artifacts, architectural design projects as prestigious entrances. The wide production range and the technology used satisfy every performance and finish required by the designers.

The revolving and sliding doors create an exclusive architectural impact and can be inserted in any structure, to enhance it and give it an original personality, perfect insulation between the hall and the exterior and high efficiency for accessing the stylish entrance.

The strength lies above all in the ability to continuously innovate the product and in the technological and architectural solutions offered, capable of responding to the typical problems of this sector. automatic doors are made in various finishes such as aluminum, steel, wood, brass and bronze; the degree of customization achieved is high.
